

Case Study: Polar Bear Live & Battersea Power Station

Our client's request was to print and install graphics to a 200 square metre space in a dry fountain at the iconic development at Circus West Battersea. The job came in at 4pm Friday and was printed and installed on site by midday Saturday.

The quick turnaround of this project and the stunning result demonstrates our can-do attitude and ability to deliver. Our client is over the moon.

The job was run on the Oce Colorado 1650.

“ John & Martin - Thank you so much for all your help on Friday / Saturday... the finished product looked amazing and you guys did a fantastic job”

“ John - your team was incredible this weekend - we really appreciate you guys pulling this out of the bag at the last minute! It looked incredible”
